

Question 2

Pdf:

PGM-1-2

Write a Php program to demonstrate date function.

```
<?php
    date_default_timezone_set("Asia/Kolkata"); // without this, it may give wrong time and sometimes wrong day also
    $morning = "Good Morning";
    $afternoon = "Good Afternoon";
    $evening = "Good Evening";
    $late = "Working Late!!!";
    $friday = "Get Ready For The Weekend";

    //get current time
    $currentTime = date("G");

    //get current day
    $currentDay = date("l");

    echo $currentTime;
    echo " ";
    echo $currentDay;
    echo " ";

    //12pm to 4pm
    if ($currentTime >= 12 && $currentTime <= 16) {
        echo $afternoon;
    }
    //5pm to 11pm
    else if ($currentTime >= 17 && $currentTime <= 23) {
        echo $evening;
    }
    //12 am to 5am
    else if ($currentTime >= 1 && $currentTime <= 5) {
        echo $late;
    }
    //6am to 11am
    else if ($currentTime >= 6 && $currentTime <= 11) {
        echo $morning;
    }

    //friday
    if ($currentDay == "Friday") {
        echo " ";
        echo $friday;
    }
?>
```

Output :

20 Saturday Good Evening
