

Question 6

Write a Php program to upload a file, and display the image details.

```
<html>
<head>
    <title>Program Six</title>
</head>
<body>
    <table border="1">
        <form action="" method="post" enctype="multipart/form-data">
            Upload Image:
            <input type="file" name="photo"><br><br>
            <input type="submit" value="Submit" name="submit"><br><br>

        <?php
            if (isset($_POST["submit"])) {
                $photo = $_FILES["photo"]["name"];
                $path = "upload/" . $photo;

                if (move_uploaded_file($_FILES["photo"]["tmp_name"], $path)) {
                    echo "<br>Image uploaded successfully!!<br>";

                    echo "<tr><td><b>Image Name:</b></td><td>";
                    echo $_FILES["photo"]["name"];

                    echo "</td></tr><td><b>Image type:</b></td><td>";
                    echo $_FILES["photo"]["type"];

                    echo "</td></tr><td><b>Image size:</b></td><td>";
                    echo $_FILES["photo"]["size"];

                    echo "</td></tr><td><b>The image:</b></td><td>";
                    echo "<img src='$path' height=200 width=300></td></tr>";

                } else {
                    echo "error";
                }
            }
        </?php>
        </form>
    </table>
</body>
</html>
```

```

    }
    ?>
</form>
</table>
</body>
</html>

```

Output:

Upload Image: No file chosen

Image uploaded successfully!!

Image Name:	shinnosuke.jpg
Image type:	image/jpeg
Image size:	147438
The image:	

OR

```

<html>
<head>
    <title>Program Six</title>
</head>
<body>
    <form action="" method="post" enctype="multipart/form-data">
        Upload Image:
        <input type="file" name="photo"><br><br>
        <input type="submit" value="Submit" name="submit"><br><br>
    </form>
</body>
</html>

```

```

<?php
    if (isset($_POST["submit"])) {
        $photo = $_FILES["photo"]["name"];
        $path = "upload/" . $photo;

        if (move_uploaded_file($_FILES["photo"]["tmp_name"], $path)) {
            echo "<b>Image Name:</b><br>" . $_FILES["photo"]["name"];

            echo "<br><br><b>Image type:</b><br>" . $_FILES["photo"]["type"];

            echo "<br><br><b>Image size:</b><br>" . $_FILES["photo"]["size"];

            echo "<br><br><b>The image:</b><br>";
            echo "<img src='$path' height=200 width=300 class='the-img'>";

            echo "<br><br>Image uploaded successfully!!";
        } else {
            echo "error";
        }
    }
    ?>
</form>
</body>
</html>

```

Output:

Upload Image: No file chosen

Image Name:

shinnosuke.jpg

Image type:

image/jpeg

Image size:

147438

The image:

Image uploaded successfully!!

OR

This program can also be done using two files - one html and the other php.

```
<!-- This is an HTML file -->
<html>
<head>
  <title>Program Six</title>
</head>
<body>
  <form action="pgm6.php" method="post" enctype="multipart/form-data">
    Upload Image:
    <input type="file" name="photo"><br><br>
    <input type="submit" value="Submit" name="submit"><br><br>
  </form>
```

```
</body>
</html>
```

```
// This is a PHP file
<?php
    if (isset($_POST["submit"])) {
        $photo = $_FILES["photo"]["name"];
        $path = "upload/" . $photo;

        if (move_uploaded_file($_FILES["photo"]["tmp_name"], $path)) {
            echo "<b>Image Name:</b><br>" . $_FILES["photo"]["name"];

            echo "<br><br><b>Image type:</b><br>" . $_FILES["photo"]["type"];

            echo "<br><br><b>Image size:</b><br>" . $_FILES["photo"]["size"];

            echo "<br><br><b>The image:</b><br>";
            echo "<img src='$path' height=200 width=300 class='the-img'>";

            echo "<br><br>Image uploaded successfully!!";
        } else {
            echo "error";
        }
    }
?>
```

Output:

Upload Image: shinnosuke.jpg

Image Name:
shinnosuke.jpg

Image type:
image/jpeg

Image size:
147438

The image:

Image uploaded successfully!!
