

Question 5

Write a Php script to login using session variable and destroy the session variable. (Insert the records manually in the database).

connect.php:

```
<?php
try {
    $con = mysqli_connect("localhost", "root", "", "mydbaa");
} catch (Exception $E) {
    echo "<script>alert('Some error occurred. Try again later');</script>"; //calling JS alert function from PHP
}

?>
```

login.php:

```
<html>
<head></head>
<body>
    <form action="" method="post">
        <table border="1">
            <tr>
                <td colspan="2" style="text-align: center;">LOGIN</td> <!-- skip style part if you want -->
            </tr>

            <tr>
                <td>Username</td>
                <td>
                    <input type="text" name="name" required>
                </td>
            </tr>

            <tr>
                <td>Password</td>
                <td>
                    <input type="password" name="pass" required>
                </td>
            </tr>

            <tr>
                <td colspan="2">
                    <input type="submit" value="Submit" name="sub">
                </td>
            </tr>
        </table>
    </form>

<?php
```

```

        session_start();
        include("connect.php");

        if (isset($_POST["sub"])) {
            $name = $_POST["name"];
            $pass = $_POST["pass"];

            $res = mysqli_query($con, "select * from login_table where Username='$name' and Password='$pass'");

            $row = mysqli_fetch_assoc($res);

            if ($row != null && $row != 0) {
                $_SESSION['id'] = $row['Id'];
                $_SESSION["Uname"] = $name;
            } else {
                echo "<script>alert('Invalid user');</script>";
            }

            if (isset($_SESSION['id'])) {
                header("location:index.php");
            }
        }
    }
    ?>
</body>
</html>

```

index.php:

```

<?php

session_start();

if($_SESSION["Uname"]) {

    ?>
        Welcome

    <?php
    echo " , " . $_SESSION["Uname"] . ".<br><br>" ;
    ?>

        Click here to <a href="logout.php">Logout</a>

    <?php
    } else
        echo "Please login first";
    ?>

```

logout.php:

```

<?php

session_start();

unset($_SESSION["id"]);
unset($_SESSION["Uname"]);
unset($_SESSION["Pass"]);

```

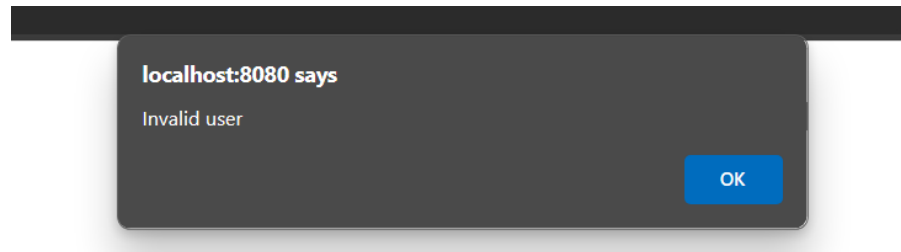

```
header("location:login.php");  
  
?>
```

Output :

login.php:

LOGIN	
Username	<input type="text"/>
Password	<input type="password"/>
Submit	<input type="button" value="Submit"/>

login.php error:

index.php:

Welcome , Oliver.
