</>

Question 3

Write a Php program to demonstrate array concept to store marks of three students in three subjects.

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Program Three</title>
</head>
<body>
    <h2>Student Marks</h2>
    <?php
        $stdMarks = array("Ramesh" =>
        array("Java" => "88",
              "Php" => "98",
              "Networking" => "78"),
        "Suresh" =>
        array("Java" => "83",
              "Php" => "90",
              "Networking" => "82"),
        "Kishan" =>
        array("Java" => "85",
              "Php" => "90",
              "Networking" => "79"));

        foreach ($stdMarks as $std => $subjectArray) {
            echo "Marks of $std:<br>";

            foreach ($subjectArray as $subject => $marks) {
                echo "$subject = $marks   ";
            }

            echo "<br><br>";
        }
    ?>
```

```
</body>
</html>
```

Output:

Student Marks

Marks of Ramesh:
Java = 88   Php = 98   Networking = 78

Marks of Suresh:
Java = 83   Php = 90   Networking = 82

Marks of Kishan:
Java = 85   Php = 90   Networking = 79
